

# COASTAL CRITTERS

## Collection Construction Tips:

● Solder edge bead should be as round and full as possible to give strength to piece. I recommend using a black patina.

● For items with more than one hook, tie a knot in fishwire on the item's lowest hook so your piece will not slide on the wire. Adjust your piece so it hangs on an angle you like, and tie the two ends together with two knots 1" - 1.5" apart at top of fishwire to hold the angle of hang. Hook goes between the two knots.

● Create U shape with tinned wire, and imbed in back solder bead where indicated on diagram. I use # 20 gage tinned wire.

● Some of these patterns need 3 hooks - 2 to support the weight, and 1 to guide the fishwire and hold the piece upright.

● For eyeballs, create round solder blob which attaches to adjacent solder bead line.

## Killer Whale:      4" x 9"    9 pieces

GLASS: W - White  
          B - Black

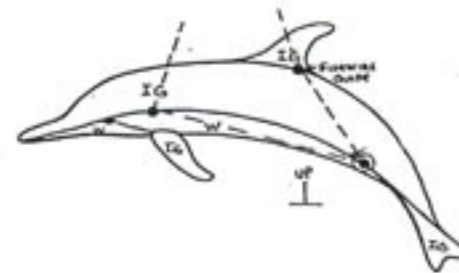

TIPS:    Feed fishwire through GUIDE hook as shown, to hold piece upright.

**Dolphin:**                      **3" x 7" 6 pieces**

GLASS: IG - Iridescent Grey  
W - White

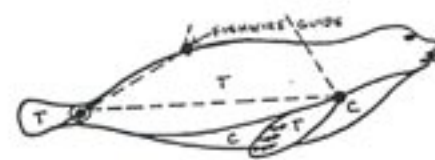

TIPS: Feed fishwire through GUIDE hook as shown, to hold piece upright.

**Seal:**                              **2" x 6.5" 5 pieces**

GLASS: T - Tan or grey  
C - Cream or white

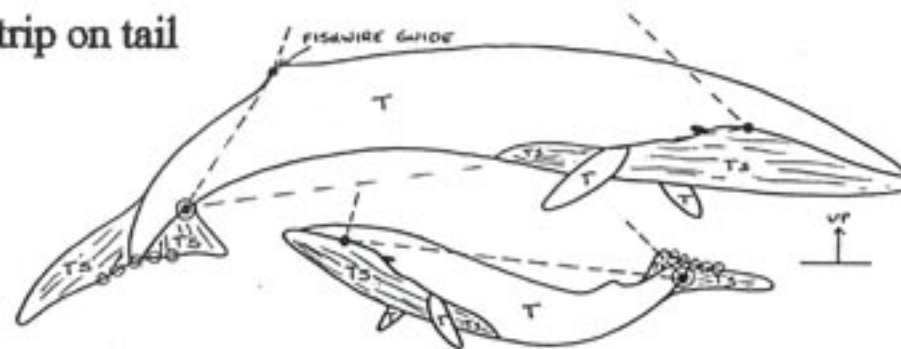

TIPS: Feed fishwire through GUIDE hook as shown, to hold piece upright. Make mouth, whiskers and fin details with wire if desired. Spare your fingers - use needlenose pliers to hold the wire!

**Blue Whale:**                      **3" x 14" 7 pieces**

GLASS: T - Turquoise, transparent hammered  
TS - Turquoise streaky

TIPS: Feed fishwire through GUIDE hook as shown, to hold piece upright. Make sure the lines in the streaky glass used for lower lip/belly lie according to the pattern. Restrip on tail optional.

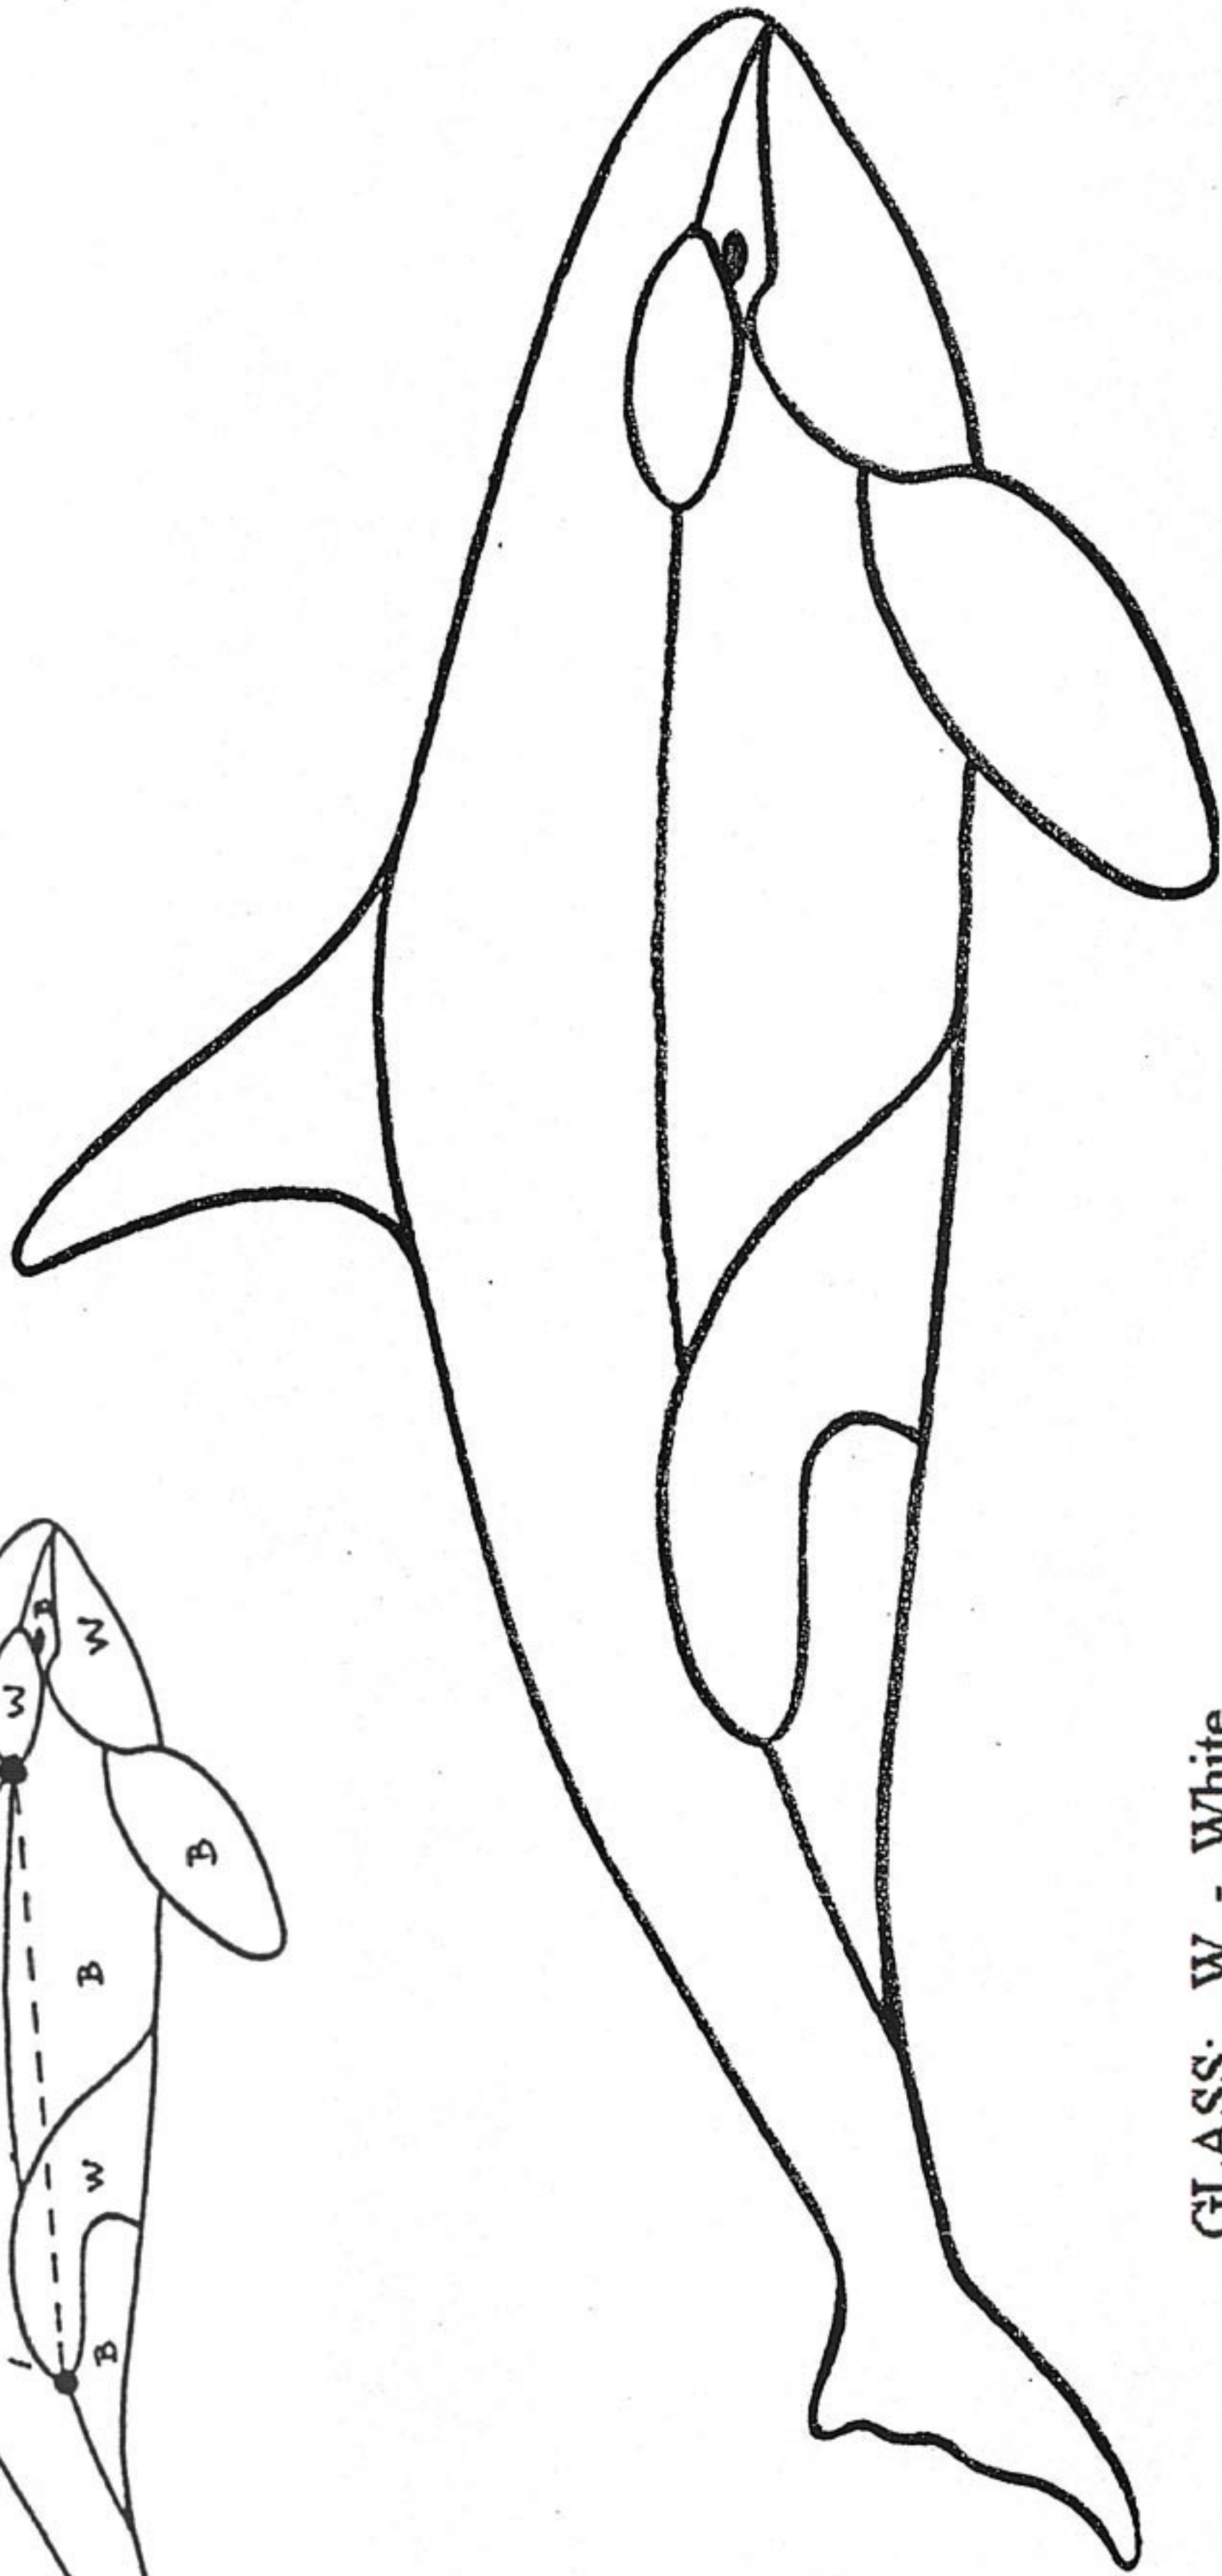

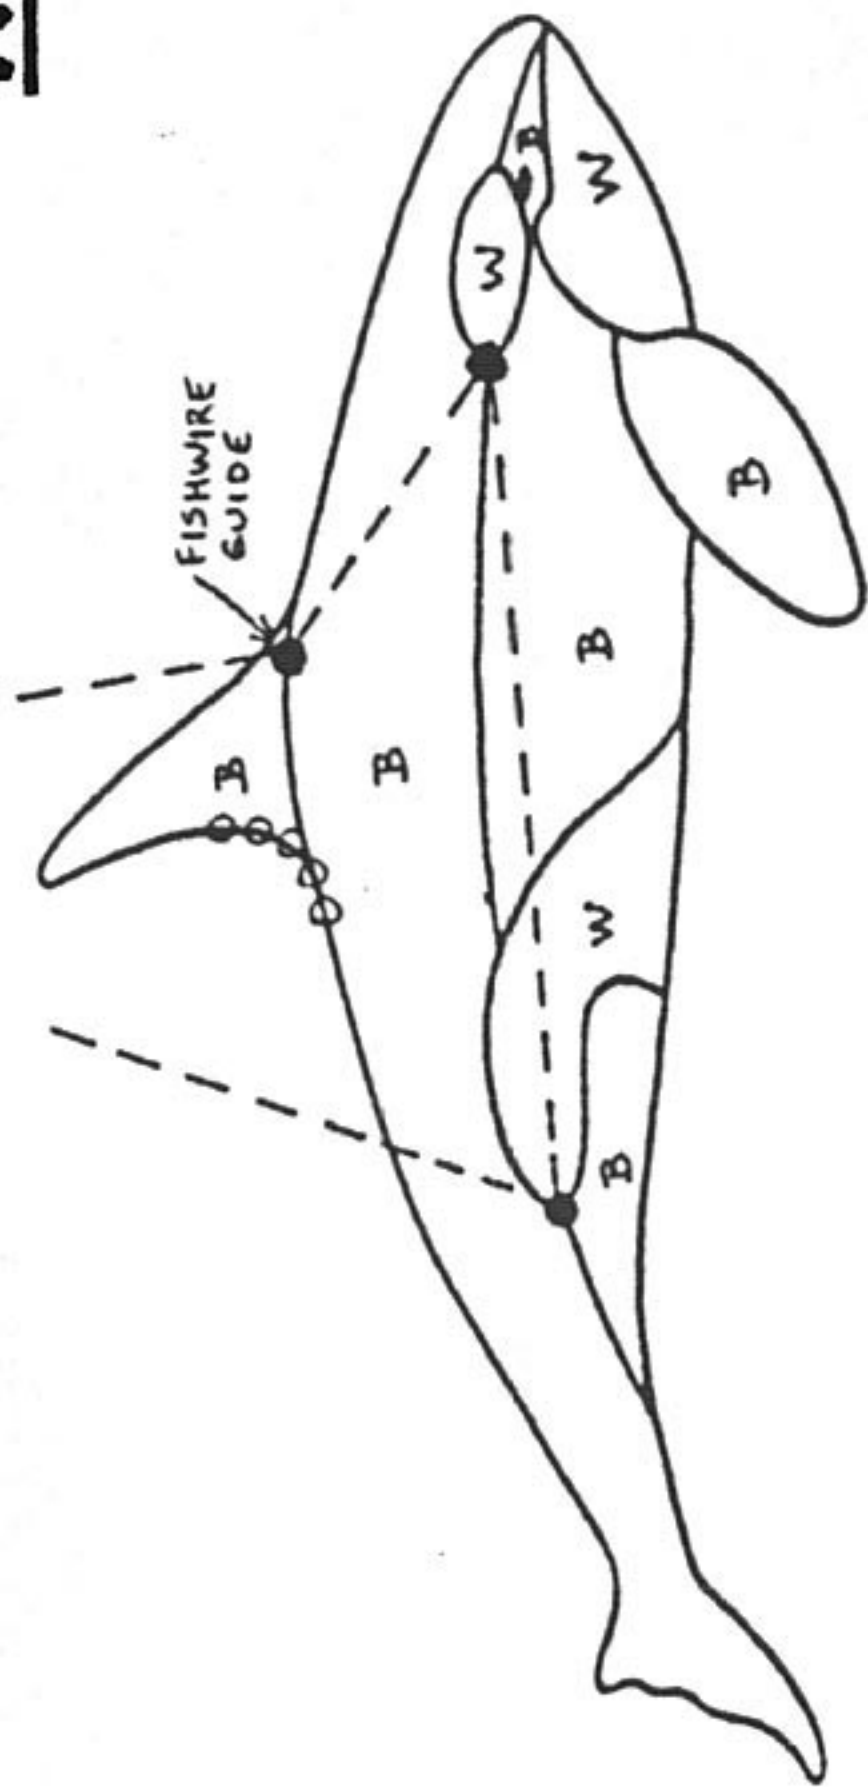

**Baby Blue:**                        **2" x 7.5" 7 pieces**

GLASS: T - Turquoise, transparent hammered  
TS - Turquoise streaky

TIPS: Make sure the lines in the streaky glass used for lower lip/belly lie according to the pattern. Restrip on tail optional.

# Killer Whale:

GLASS: W - White

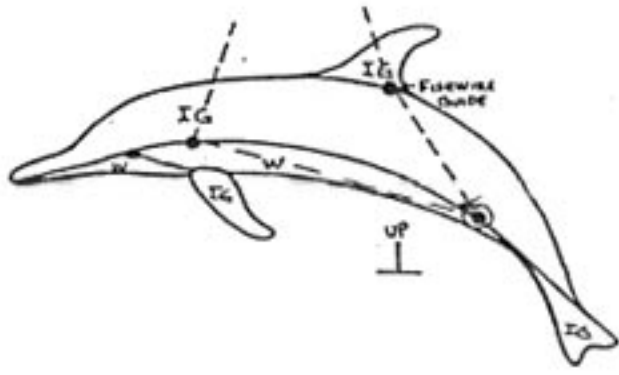

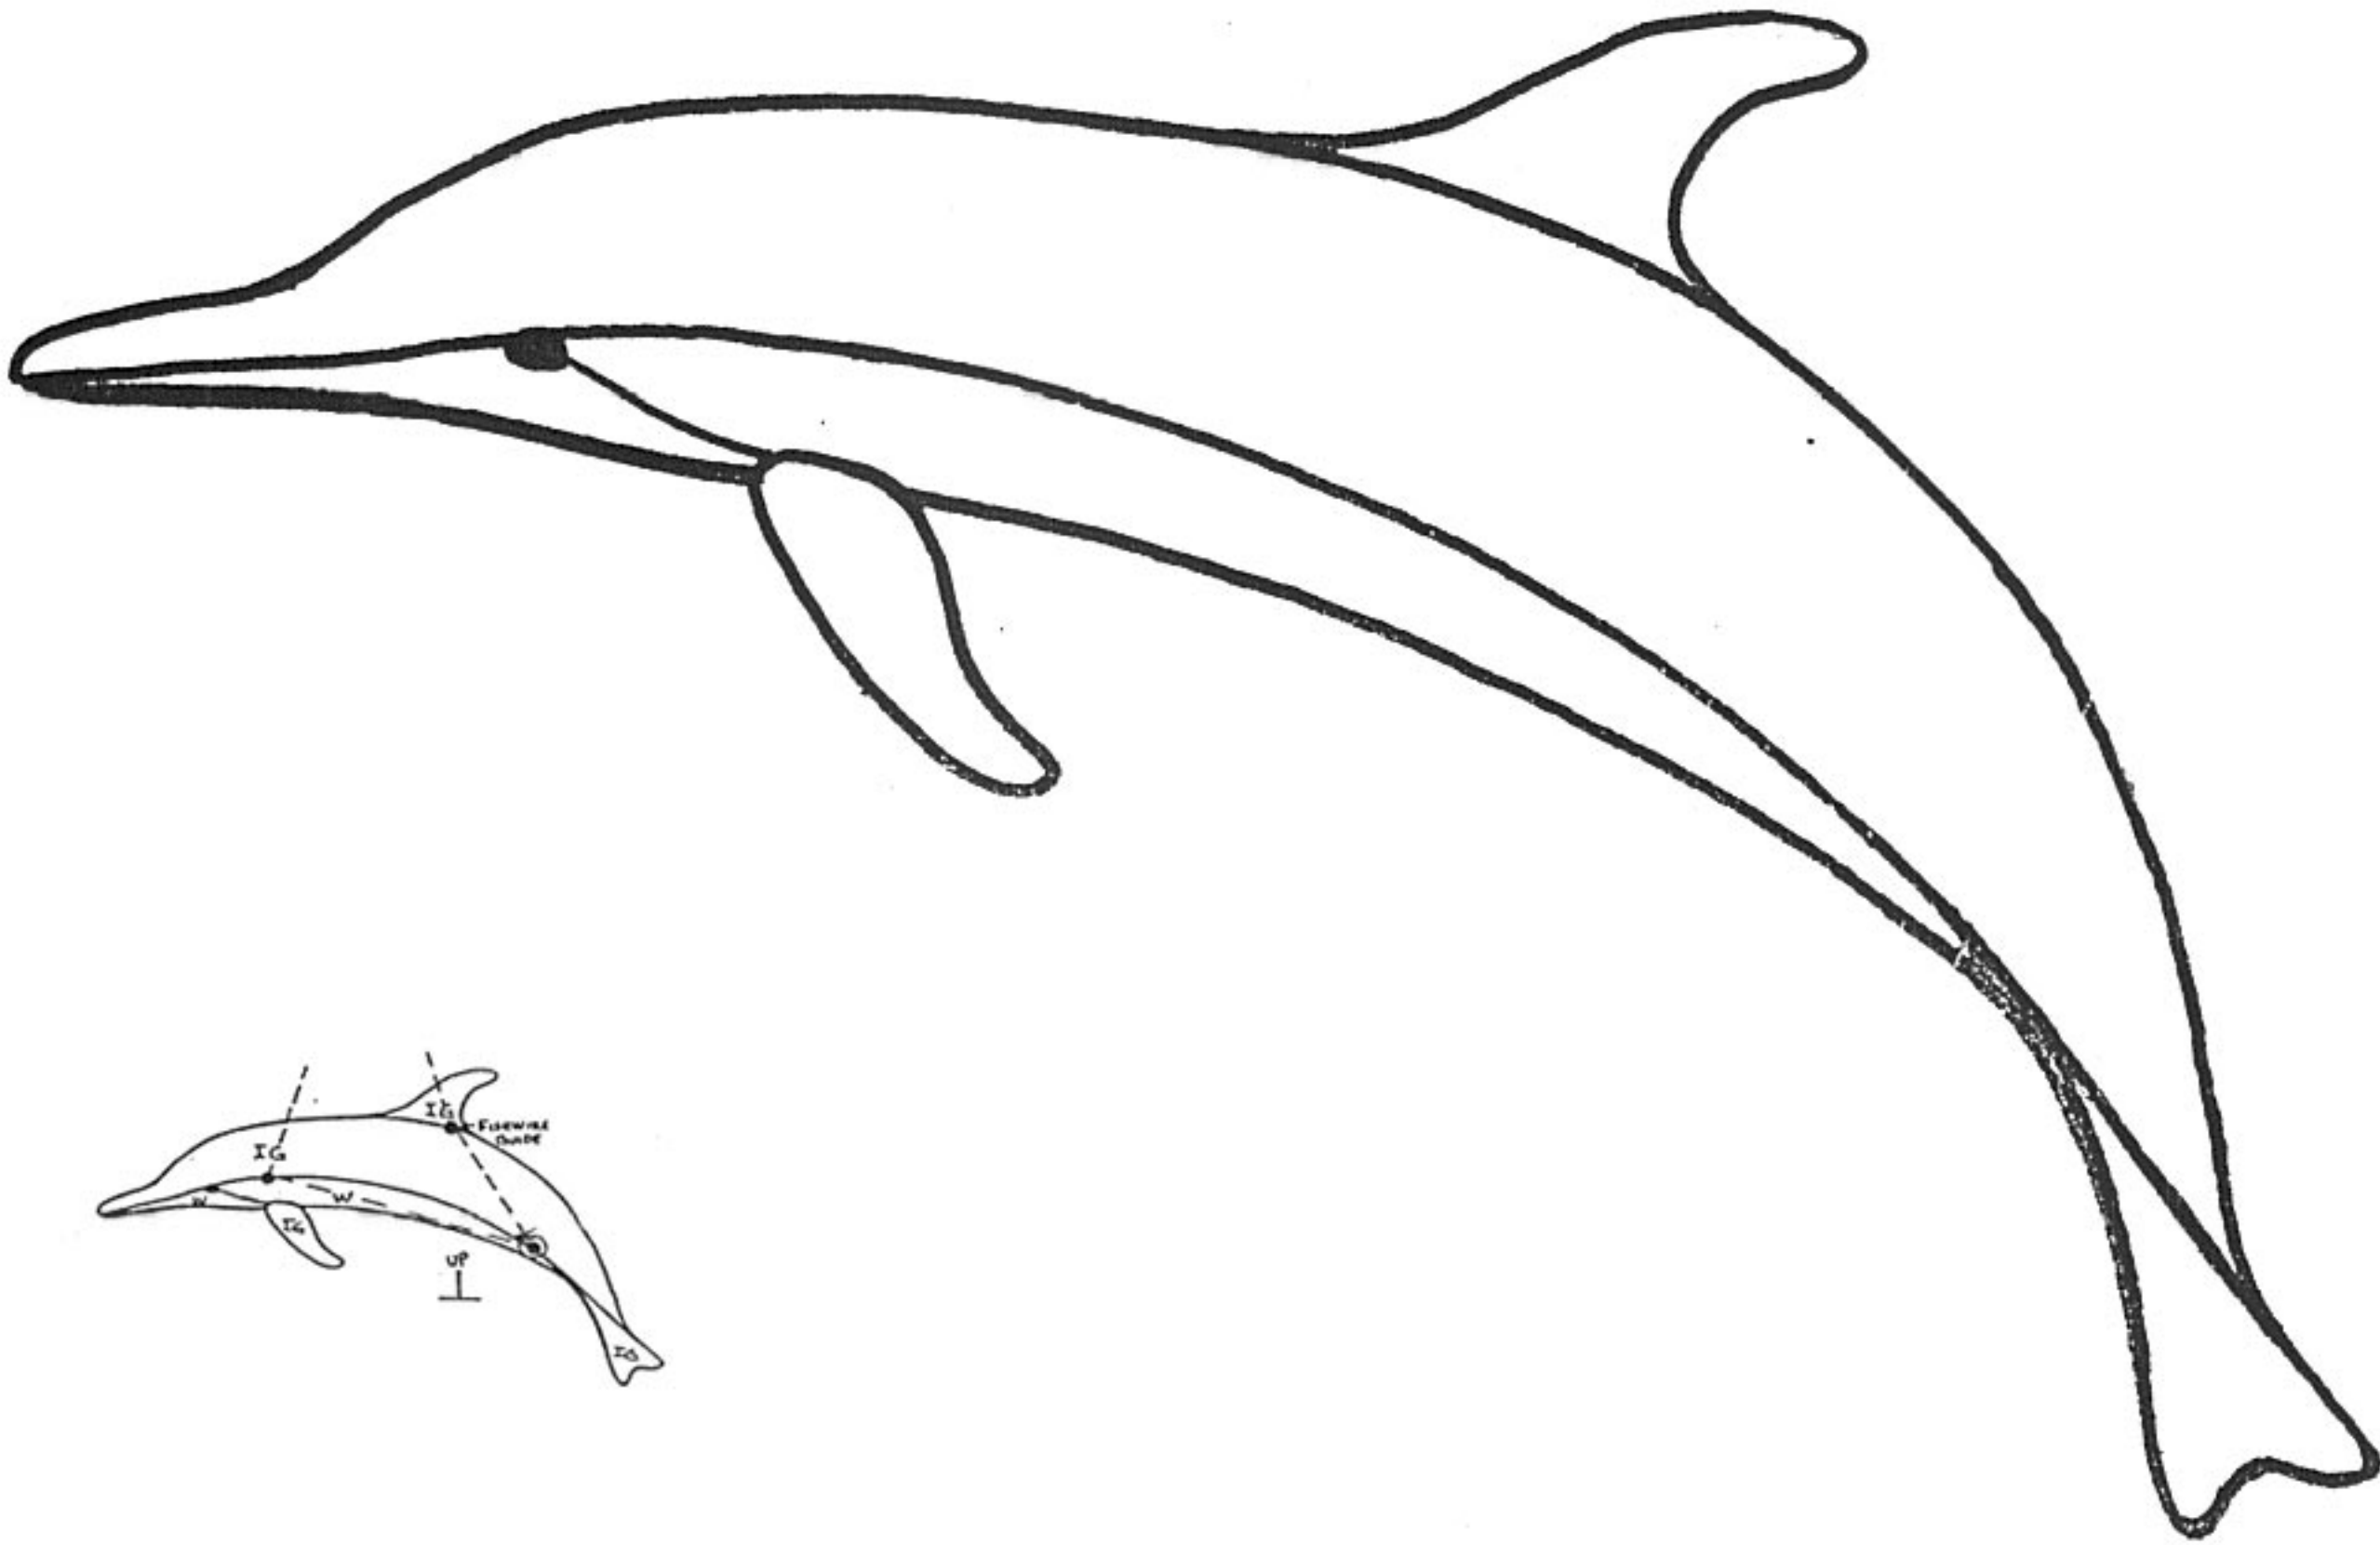

B - Black

TIPS: Feed fishwire through GUIDE hook as shown, to hold piece upright.
